"GET" means the integrator can pull information from METRC but doesn't upload anything into METRC

Licensees should make sure any integrator they contract with can provide the METRC functionality they need:

- Growers will need Plants, Packages, Harvest, Rooms, Strains, and Items
- Processors will need Packages, Strains, and Items, and should have Rooms
- Provisioning Centers will need Packages, Sales, Strains, and Items, and should have Rooms
- Safety Compliance Facilities will need Packages, and should have Rooms, Strains, and Items
- Secure Transporters have no inventory and don't use any of the functionalities listed above
